

Notes

Application: Large Educational Video Conference Room, 17 people seated

Light distribution:

Facial vertical illumination: (front), good (back), from existing troffers

Luminaires: 10 MJ255

Lens: None required

Grid / Ceiling height: 9' 3"

Suspension: none, grid mounted

Horizontal distance: 6-9'

Tilt from horizontal: 45 dgr. built in

Throw distance: 7-10'

Power consumption: 1100 Watts

STRATEGY:

Two rows of troffer luminaires were removed to make room for the MJ255s. The outer two rows were retained to provide fill light on the first two people plus back light for all
